PROJECT EXPERIENCE

Project: FullStack HR Management System - LCA | github: Hr_management_project
June 2025 – August 2025
Designed and implemented a full-stack HR system to manage employee salaries, reviews, and departmental data in a structured and efficient workflow.
- Built dynamic backend APIs with Node.js, Express, and MySQL to handle payroll and secure data storage.
- Developed a responsive Vue.js front-end to display employee data, salary records, and real-time review updates.
- Implemented validation checks and automation to maintain data accuracy, including payroll creation and ratings

Project: Fullstack eCommerce Platform – LCA | github: ChauffeurLux
August 2025
Built a digital-first eCommerce site for "ChaffeurLux" with seamless booking, secure payments, and a tailored vehicle catalogue for luxury tourism, corporate and special events market.
- Developed the front-end using React.js, JS, HTMl and CSS, ensuring an elegant, mobile-first user experience.
- Implemented backend logic with Node.js, MySQL and JWT authentication to manage user sessions and bookings.
- Integrated Stripe for payments and Nodemailer for automated booking confirmations.
- Created an admin dashboard, customer reviews and a responsive fleet catalogue.
